Grade 4 Loves New Jersey

The fourth grade has been very busy using their research skills to study our wonderful state of New Jersey. Students worked in partners to learn about the Garden State. They used their brand new Social Studies textbooks to find out our state motto, flower, insect, nickname, and much, much more! We learned that New Jersey has 21 counties and that our flag was adopted in 1896.

Did you know that the third stripe on the American flag represents New Jersey? To find out more fun facts about New Jersey you can look at our "4th Grade Falls in <3 with NJ!" bulletin board outside of our classroom. Students sponge painted leaves and wrote questions and answers to our findings on each beautiful, colorful leaf.
