

Saint Rose of Lima Academy

Respect, Love, and Education Through Christ

St. Rose students were treated to a musical afternoon as Dennis Kobray presented the life of Wolfgang Amadeus Mozart. The students discovered first-hand the music, feelings and life of Mozart which was as enjoyable as it was informative. Through the generosity of the Home School Association several enriching and educational assemblies are presented each year. Our next assembly will be by the Franklin Institute which will present "Hot and Cold." This is a traveling science show from the institute that covers concepts such as states of matter, molecules and temperature. The students will make balloons shrink, bubbles freeze and rubber balls shatter. They will also learn the everyday application of nitrogen in manufacturing food production and medicine. The students and faculty are grateful to the HSA for providing us with these wonderful opportunities.
